

XF1 L

Product code VISY XF1 L 907 248

Product name Protective visor XF1 L

Features Ergonomic and reusable protective visor with a long protective lens, designed for prolonged use. Helps protect against contamination in demanding working environments. Can be disinfected using a 70 % alcohol solution. Can be used together with a face protective mask and prescription glasses. Universal size (54-64 cm) offers precise adjustment with the help of an elastic strap and optimal wear comfort thanks to the included foam insert. Lens made from thin and highly resistant PMMA shaped to prevent fogging. Console made from ABS plastic, suitable for medical use. Compact packaging. Not designed to protect against mechanical impact or flying particles. Compliant with EN 166.

 Foam: PE

Lens dimensions 365x250 mm

Weight 96 g

Compliance and classification Marking: CE
 Standard: EN 166
 PPE Category: II

Disinfection 70 % alcohol solution.

Packaging Packing unit: 50 pieces
 Product packaging dimensions (mm): 255x370x10
 Transport packaging dimensions (mm): 400x300x320

Manufacturer Geoenergetika, družba za okolju prijazne energije, d.o.o.

Warning The XF1 L protective visor is designed to offer increased protection of facial areas against contamination. However, due to its design, its use alone cannot guarantee complete protection against viruses, bacteria, or other biological agents. In order to maximize protection against biohazards, the protective shield should always be used together with other protective equipment while observing appropriate safety protocols.
