

XF1 S

Product code VISY XF1 S 907 249

Product name Protective visor XF1 S

Features Ergonomic and reusable protective visor with a short protective lens, designed for prolonged use. Helps protect upper face area against contamination with dirt and droplets in demanding working environments. Can be disinfected using a 70 % alcohol solution. Can be used together with a face protective mask and prescription glasses. Universal size (54-64 cm) offers precise adjustment with the help of an elastic strap and optimal wear comfort thanks to the included foam insert. Lens made from thin and highly resistant PMMA shaped to prevent fogging. Console made from ABS plastic, suitable for medical use. Compact packaging. Not designed to protect against mechanical impact or flying particles.

Strap: textile, elastic (white or black)
Foam: PE

Lens dimensions 305x150 mm

Weight 77 g

Packaging Packing unit: 50 pieces
Product packaging dimensions (mm): 155x310x10
Transport packaging dimensions (mm): 400x300x320

Disinfection 70 % alcohol solution.

Manufacturer Geoenergetika, družba za okolju prijazne energije, d.o.o.

Warning The XF1 S hygiene visor is designed to offer increased protection of upper facial areas against contamination from dirt and droplet infection. However, due to its design, its use alone cannot guarantee complete protection against viruses, bacteria, or other biological agents. In order to maximize protection against biohazards, the protective shield should always be used together with other protective equipment while observing appropriate safety protocols.
